Fantech’s side port connection HRV for budget conscious house projects, the SHR 150 unit brings a continuous supply of fresh air into a home while exhausting an equal amount of contaminated air. During winter, fresh incoming air is tempered by the heat that is transferred from the outgoing air so you save on energy costs, while during summer, the incoming air is pre-cooled if the house is equipped with an air cooling system. The SHR 150 is equipped with automatic defrost mechanisms so you can use your HRV all year long.

Features
- Compact design
- Fans with backward curved blade
- Electrostatic filters (washable)
- Aluminum heat recovery core
- Removable screw terminal for easy connection
- Lightweight 46 lbs (20Kg)
- Multiple speed operation

Optional Controls
- ECO-Touch™ (#44929) – Programmable Touch Screen Wall Control
- EDF7 (#44883) – Electronic multi-function dehumidistat
- RTS2 (#40164) – 20 minute timer over-ride
- RTS5 (#44734) – 20/40/60 minute timer
- MDEH1 (#40172) – Dehumidistat

Specifications
- Duct size = 6” (152 mm)
- Voltage/Phase = 120/1
- Power rated = 156 W
- Amp = 1.4 A
- Average airflow = 159 cfm (75 L/s)
  @ 0.4° P_s (100Pa)

Fans
Two (2) factory-balanced fans with backward curved blades. Motors come with permanently lubricated, sealed ball-bearings to guarantee long life and maintenance-free operation.

Heat Recovery Core
Aluminum heat recovery core covered by a limited lifetime warranty. Core dimensions are 9” x 9” (229 x 229 mm) with a 15” (380 mm) depth. Our heat exchangers are designed and manufactured to withstand extreme temperature variations.

Defrost
A preset defrost sequence is activated at an outdoor air temperature of 23°F (-5°C) and lower. During the defrost sequence, the supply blower shuts down & the exhaust blower switches into high speed to maximize the effectiveness of the defrost strategy. The unit then returns to normal operation, and continues cycle.

Serviceability
Core, filters, fans and drain pan can be easily accessed through latched door. Core conveniently slides out on our new easy glide core guides. 17” (432 mm) of clearance is recommended for removal of core.

Case
24 gauge galvanized pre-painted steel corrosion resistant.

Insulation
Cabinet is fully insulated with 1” (25 mm) high density expanded polystyrene.

Filters
Two (2) washable electrostatic panel type air filters 8.5” (216mm) x 15” (380mm) x 0.125” (3mm).

Controls
External three (3) position (Low/Stand By/Medium) rocker switch that will offer continuous ventilation. Fantech offers a variety of external controls. (see controls)

Installation
Unit is typically hung by using installation kit supplied with unit. Mounting bolts provided on top four (4) corners of unit. An optional wall bracket is available.

Warranty
Limited lifetime on aluminum core, 7 year on motors, and 5 year on parts.
**Dimensions & Airflow**

Circlear of 17” (432 mm) in front of the unit is recommended for removal of core. All units feature three foot plug-in power cord with 3-prong plug.

**Requirements and standards**

- Complies with the UL 1812 requirements regulating the construction and installation of Heat Recovery Ventilators
- Complies with the CSA C22.2 no. 113 Standard applicable to ventilators
- Complies with the CSA F326 requirements regulating the installation of Heat Recovery Ventilators
- Technical data was obtained from published results of test relating to CSA C439 Standards
